

# St Mary's CE (VC) Primary School

'Learning to Live Life in all it's fullness'

## Our Vision for Science

Here at St Mary's we believe in offering our children the experiences that will help them flourish. In Science, we want our children to understand what it means to be a Scientist. Becoming Scientists involves developing an understanding, enjoyment and interest in Science. Developing scientific enquiry skills and being inquisitive learners by asking questions, investigating, exploring and explaining. We want our children to appreciate the impact that Science has on our lives and the world in which we live.

## Science at St Mary's CE Primary School is good when...

We ask and answer our own questions

We work together

We engage in learning inside and outside

We are motivated by Science in fun, engaging and practical learning experiences

We work resiliently to make progress and gain new skills or knowledge in every session

We are enthused by learning links with the wider world and curriculum

We practically explore, investigate, predict, compare, classify and test ideas (including our own)
